Corporate governance practices refer to the decision-making systems through which owners, directly or indirectly, control a company. Investor’s business model of active ownership is to create value in the portfolio companies. Good corporate governance is not only an important matter for Investors’s own organization. It is an important part of Investor’s core business. One of the cornerstones and a central part in Investor’s value creation plans for the portfolio companies is high corporate governance. Investor’s business model and possibilities to create value for the shareholders builds on owner influence in the companies. A description of the work with the portfolio companies is presented in the section Active Ownership on page 11.

It is also of outmost importance that the corporate governance within Investor has a high standard. Below the corporate governance within Investor is described.

Investor is a Swedish limited liability corporation that is publicly traded on the Nasdaq OMX Stockholm exchange and adheres to the Swedish Code of Corporate Governance (the Code). The Code is published on www.bolagsstyrning.se, where a description of the Swedish Corporate Governance model can be found.

This Corporate Governance Report is submitted in accordance with the Swedish Annual Accounts Act and the Code. It explains how Investor has conducted its corporate governance activities during the 2013 financial year.

This report avoids repeating information in applicable regulations and focuses on presenting the specific corporate governance matters for Investor.

The Corporate Governance Report has been reviewed by Investor’s auditor, see page 99.

Investor complied with the Code during 2013. Investor did neither deviate from the Nasdaq OMX Stockholm Rule Book for Issuers nor from good stock market practice.

Examples of external framework for governance at Investor:
- Swedish Companies Act.
- Accounting legislation, e.g. Swedish accounting Act, Swedish Annual Accounts Act, and IFRS.
- Nasdaq OMX Stockholm’s Rule Book for Issuers.
- Swedish Code of Corporate Governance.

Examples of internal framework for governance at Investor:
- Articles of Association.
- Board Instructions, Rules of Procedure.
- Policies such as Compliance Policy, Information Policy, Risk Policy, and Safety Policy.
- Process descriptions for each business area.
- Ethical guidelines.
Annual General Meeting
The 2014 Annual General Meeting (AGM) of Investor will take place on May 6 at the City Conference Centre in Stockholm. Shareholders who would like to have a particular matter discussed at the AGM should submit such request to the Nomination Committee before March 11 and to the company before March 18, 2014. Contact information is available on the company website.

Investor always strives to ensure that the Board, the Management Group, the Nomination Committee and the auditor are present at the AGM.

Each Investor shareholder entitled to vote may vote for the entire number of the shares owned and represented by the shareholder without restrictions to the number of votes. A-shares are entitled to one vote and B-shares are entitled to 1/10 vote.

In addition to applicable law, regarding shareholder’s right to participate at the AGM, there is a requirement in Investor’s Articles of Association of confirming intention to attend within given time, stated in the notice of the AGM. The shareholder shall at the same time also inform of any assistant participation.

The documents from the AGM and the minutes recorded at the AGM are published on the website.

Shares, ownerships and distribution policy
At year-end 2013, Investor had 132,433 shareholders according to the register of shareholders maintained by Euroclear Sweden. Institutional owners dominate the ownership structure. See page 27 for Investor’s largest shareholders and page 89 for Investor’s share capital.

Investor’s distribution policy is to distribute a large percentage of the dividends received from listed Core investments, as well as to make a distribution from other net assets corresponding to a yield in line with the equity market. Investor AB’s goal is to generate a steadily rising annual dividend.

The 2013 AGM decided on a dividend payment of SEK 7.00 per share to shareholders. The Board and President recommend to the 2014 AGM a distribution of dividend to shareholders of SEK 8.00 per share.

Repurchases of own shares
Since year 2000, the Board has requested and been granted a mandate by the AGM to repurchase the company’s shares. The company’s holding of its own shares should not exceed 1/10 of all shares outstanding in the company. In 2013, 1,000,000 B-shares were repurchased and 954,694 B-shares of the repurchased shares were transferred. Also, for the 2014 AGM, there is a proposal to give authorization to the Board to buy back Investor shares in order to hedge the long-term share-based remuneration programs.

Nomination Committee
According to the current instruction for the Nomination Committee, the Committee shall consist of one representative from each of the four shareholders or groups of shareholders controlling the largest number of votes that desire to appoint a representative and the Chairman of the Board. The register of recorded shareholders and shareholder groups from Euroclear Sweden and other reliable shareholder information available to the company as of the last business day of August serves as the basis for identifying the members. For further information regarding instruction for the Nomination Committee, see the company website.

Up until February 28, 2014, the Nomination Committee had held four meetings at which the minutes were recorded. They also stayed in contact between these meetings. The AGM documents related to the Nomination Committee are published on the website.
At the 2013 AGM, the registered firm of auditors, Deloitte AB was appointed auditor until the close of the 2014 AGM. The Authorized Public Accountant Thomas Strömberg is the auditor in charge.

The auditing firm has, besides the audit, conducted a limited number of other assignments on behalf of Investor. These assignments mainly consisted of services associated with auditing, such as in-depth reviews during audit. By limiting the extent to which the auditor is allowed to perform services other than auditing, it is possible to ensure that the auditor is independent of the company. For details on remuneration to auditors, see note 10, Auditor’s fees and expenses.

Investor’s auditor: Deloitte AB
Auditor-in-charge: Thomas Strömberg, Authorized Public Accountant
Born: 1966
Auditor-in-charge for Investor since 2013
Shares in Investor AB: 0 shares
Other auditing assignments: Karolinska Development AB, Mekonomen AB, Rezidor Hotel Group AB, Tele2 AB
Board
Pursuant to the Articles of Association, the Board must consist of no less than three and no more than thirteen Directors, as well as no more than four deputies. Since the 2013 AGM, the Board has consisted of thirteen members and no deputies. The percentage of women is 23 and the percentage of foreign members on the Board is 31 percent. A more detailed presentation of the Board is found on the adjacent table, on page 38 and on the website.

New Board members are introduced to Investor’s business operations by attending an introduction orientation involving, for example, meetings with department managers. Board members are continuously updated on new regulations, practices and statutory requirements that may affect the business.

The composition of Investor’s Board meets the requirements concerning the independence of Directors. Several of the Board members are Directors of Investor’s holdings and they receive remuneration from these companies. It is the opinion of the Nomination Committee and the company that this remuneration does not entail a dependence of these members on Investor or its Management. Investor is an industrial holding company and work actively through the Boards of its holdings to identify and drive value-creating initiatives. The work of the Boards of Directors in Investor’s holdings is the core of Investor’s active ownership model. For Investor, where a fundamental component is to have the right Board in each company, it is natural that Members of Investor’s Board of Directors and Management have Board assignments in Investor’s holdings. The assessment of each Board member’s independence is presented on page 31.

The Chairman of the Board, Jacob Wallenberg, is in addition to his active involvement in Investor also involved in a number of other companies and serves on a number of international organizations. He has an extensive international network and he participates in various policy forums.

Evaluation of the Board and CEO
Pursuant to the Rules of Procedure, the Chairman of the Board initiates an annual evaluation of the performance of the Board.

The 2013 evaluation was answered by each Board member. In addition, the Chairman met with each Board member separately to discuss the work done by the Board during the year.

The objective of the evaluation is to provide insight into the Board members’ opinions about the performance of the Board and identify measures that could make the work of the Board more effective. A secondary objective is to form an overview of the areas the Board believes should be afforded greater scope and where additional expertise might be needed within the Board.

The Board discussed the results of this year’s evaluation and the Chairman of the Board presented them to the Nomination Committee.

Investor’s Board continuously evaluates the performance of the President by monitoring the development of the business in relation to the established objectives. A formal performance review is carried out once a year.

Work of the Board in 2013
During the year, the Board held 15 meetings, of which 11 were regular meetings, one was statutory and three were extraordinary. The attendance of each Board member at these meetings is shown in the table on page 34. The secretary of these Board meetings was General Counsel, Petra Hedengran. Prior to each meeting, Board members were provided with comprehensive written information on the issues that were to be discussed.

During the year, the Board devoted considerable time to the investment of the new core investment Permobil, the divestment of Gambro, acquisition of additional shares in ABB and Ericsson, and other strategic matters regarding the holdings. In addition, the Board has considered the capital structure and refinancing of Mölnlycke Health Care and Aleris, and acquisitions within Financial Investments. Prior to each transaction, extensive analysis were presented to the Board.

The Board devoted time to both internal and external presentations of the financial markets in particular countries, as well as from a global perspective. The Board discussed the development and the effects on industries, markets and individual companies, paying particularly close attention to Investor’s holdings and the long-term strategies of such holdings.

During the year the Board also has met with the CEOs of Investor’s holdings, inter alia Aleris, Wärtsilä, Mölnlycke Health Care and SEB, for presentations of their companies.

The financial reports presented at every regular Board meeting, including those prior to the year-end and interim reports, are an important aspect of the Board’s work. The Board also receives regular reports on the company’s financial position. At regular Board meetings, reports are delivered on the ongoing operations in the business areas, together with in-depth analyses and proposed actions regarding one or more of the company’s holdings.

Committee work is an important task performed by the Board. For a description of the work conducted by the Committees during 2013, see page 33.

During the year, the company’s Management presented value creating plans for Core Investments, including analyses of the holdings’ operations and development potential in the business areas where they are active. These analyses and their implications were discussed and assessed by the Board with a focus on the individual companies as well as in the context of overall strategic discussions. The Board also discussed the overall strategy thoroughly at the yearly strategy review.
The Board received and discussed reports on the composition of portfolios and developments within Financial Investments, including Investor’s involvement in EQT and the operations of Investor Growth Capital.

In addition to participating in meetings of the Audit Committee, the company’s auditor also attended a Board meeting during which Board members had the opportunity to pose questions to the auditor without representatives of the company’s Management being present.

**Board Committees**

In order to increase the efficiency of its work and enable a more detailed analysis of certain issues, the Board has formed three Committees: the Audit Committee, the Remuneration Committee and the Finance and Risk Committee. The members of the Committees are appointed for a maximum of one year at the statutory Board meeting. The Committee’s duties and decision-making authorities are regulated in the instruction presented to each Committee annually.

The primary objective of the Committees is to provide preparatory and administrative support to the Board. The issues considered at Committee meetings are recorded in minutes and reported at the next Board meeting. Representatives from the company’s specialist functions always participate in Committee meetings.

The Audit Committee is responsible for assuring the quality of the financial reporting and the efficiency in the internal control system. The Audit Committee is the primary way in which the Board and the company’s auditor communicate with each other.

The responsibilities of the Remuneration Committee are, among other things, to evaluate and prepare guidelines for salary and other remuneration, and to decide remuneration to the members of the Management Group, except for the President for whom the Board as a whole sets the remuneration.

The Finance and Risk Committee ensures that the company’s compliance efforts are effective and monitor risk exposure and financial strategies.

**Remuneration**

**Remuneration to the Board**

The total remuneration to the Board approved by the AGM 2013 was SEK 9.13 m. Information on specific compensation is provided in the table on page 34 and in note 9, Employees and personnel costs.

The Nomination Committee believes it is to the advantage of the company and its shareholders if Board members are either shareholders in the company or have similar exposure to changes in the price of Investor’s share over the long term. Since the 2008 AGM, it is possible for Board members to receive a portion of their compensation in the form of synthetic shares.

At the statutory Board meeting in April 2013, the Board adopted, as in 2011 and 2012, a policy stating that Board members, who do not already have such holdings, are expected to, over a five-year period, acquire an ownership in Investor shares.
Investor strives to offer its employees a total remuneration package that is in line with the market and enables the recruitment and retention of the most suitable employees. Comparative studies of relevant industries and markets are carried out annually in order to evaluate current remuneration levels and to determine what constitutes a total level of remuneration in line with market practice.

The total remuneration for the President is determined by the Board. Remuneration issues concerning other members of the Management Group are decided by the Remuneration Committee, after which the Board is informed.

When determining salaries, the employee’s total compensation package is benchmarked to the external market. The mix between the various components: fixed cash salary, variable cash salary, long-term variable remuneration, pension and other remuneration and benefits, is set depending on the employee’s position.

Investor’s policy is for the Management Group to own shares in Investor corresponding to a market value of at least one year’s gross salary for the President and at least half of one year’s gross salary for the other members of the Management Group.

The development of the programs is evaluated on a continuous basis throughout the year. The Remuneration Committee also regularly carries out a more thorough evaluation of the programs.

The long-term variable remuneration program proposed by the Board and decided by the AGM in 2013 was substantially identical to the program from 2012. The Board has decided to propose to the AGM 2014 a long-term variable remuneration program in which all employees may participate and which is essentially identical to the program from 2013. The Board’s final proposal will be announced in the Notice of the 2014 Annual General Meeting.

The Board of Directors’ proposal regarding guidelines for salary and other remuneration for the President and other Members of the Management Group to the AGM 2014 comply with the guidelines for remuneration decided 2013, and are based on agreements entered into between Investor and each executive.

See note 9, Employees and personnel costs (page 59), and on the website, for the most recently approved guidelines on remuneration to senior executives and for a description on the long-term variable remuneration program.

1) At point of allocation.
2) The synthetic shares are valued in connection with allocation after the Annual General Meeting 2013 and shall be based on an average market price of Investor shares of class B during a measurement period in conjunction with the allocation, see note 9, Employees and personnel costs.

For total value of the Board fee including synthetic shares and dividends at year-end, see note 9, Employees and personnel costs.
term variable remuneration programs. See the website for the information and evaluation that has to be reported according to the Code.

For the Board’s proposal regarding guidelines for salary and other remuneration for the President and other Members of the Management Group to the 2014 AGM, see the website.

The President, the Management Group and the organization

The President, Börje Ekholm’s responsibilities include among other things ongoing investments and divestments, personnel, finance and accounting issues and regular contact with the company’s stakeholders, such as public authorities and the financial market. The President ensures that the Board is provided with the requisite material for making well-informed decisions.

The President has appointed a Management Group that has day-to-day responsibility for different parts of Investor’s business. There has been no change in the Management Group during 2013. For more information about the President and Management Group, see page 40.

The Management Group holds meetings focused on the company’s strategy four to five times a year, including risk assessment. The Management Group regularly works with specific business transactions. During the year the Management Group has had focus on the purchase of Permobil, the divestment of Gambro and the refinancing of Mölnlycke Health Care. The Management Group also worked proactively to ensure the company’s financial flexibility. The Management Group regularly monitors the organization to ensure that it has the right competences given the company’s strategy, goals and challenges.

During the year the Management Group initiated workshops with all personnel regarding Investor’s ethical guidelines, see section Sustainable business.

Investor’s Analysts work in business teams with one or more investments. These individuals continuously research each holding, the sector to which it belongs and competitors to identify value creating initiatives, risks and their return potential.

In the listed Core Investments, see page 13, Investor exercises its active ownership through Board representation.

Investor governs its wholly-owned operating subsidiaries, see page 13, through its representation on the Boards of those companies. Investor’s Board representatives are appointed by the President of Investor. The Board representatives ensure value creation in the companies and that indications of problems in the portfolio companies, that could impact Investor, are dealt with in an efficient manner. They are also responsible for ensuring that Investor’s Management Group and Board are provided with relevant information.

Investor Growth Capital is governed as a standalone wholly-owned subsidiary.

The governance of the partner-owned companies is carried out jointly with each partner.

Investor’s Trading function is governed by mandates and limits set by the Board.

Support functions on group level, to the investment organization, are governed by approved policies and instructions.

Control functions

Using the risk policy approved by the Board as framework, the Risk Control function identifies and monitors the risks that Investor is exposed to. This function is responsible for coordinating all internal reporting of investor’s significant risks at aggregate level and developing awareness of different types of risk. The Risk Control function reports to the Finance and Risk Committee.

The Compliance function supports Investor’s compliance with laws and regulations, and maintains internal regulatory systems and education to this end. The Compliance function reports to the Finance and Risk Committee.

The Internal Control function is a review function that provides objective support to the Board on matters relating to the internal control structure, partly by investigating major areas of risk and partly by performing reviews and follow-ups in selected areas. The Internal Control function plans its work in consultation with the Audit Committee, Management Group and the external auditor. It also regularly provides reports on its work to the Audit Committee during the year.

Sustainable business

The Management Group works actively with engaging all employees to develop the corporate culture and act accordingly. As long-term owner it is important that Investor’s core values and culture are built on long-term sustainable objectives and valuations. During 2013 an initiative has been taken to review Investor’s ethical guidelines and core values with focus on instructions for gifts and other benefits. All employees have participated in internal education and workshops in this matter.

Health, the working environment and safety are very important to Investor in its role as employer. Internal policies and instructions constitute important control documents within the areas of ethics, anti-corruption and whistleblowing. Investor supports the OECD Guidelines for Multinational Enterprises and the ten principles of the UN Global Compact, the world’s biggest initiative within the CR field.

Since 2007, Investor reports its climate footprint, as part of the Carbon Disclosure Project. In the 2013 Nordic CDP Report, Investor’s score was 76 out of a possible 100 points, putting Investor at the top for its category of companies in Sweden.

Investor also supports social initiatives within its sponsorship portfolio: Ung Företagsamhet and Business Challenge, both working to promote entrepreneurship among young adults and
the Curiosity Club which encourages young women to seek leadership positions within the technical field. More information about Investor’s sponsorship portfolio is found on the website.

For further information on Investor’s role as an owner regarding sustainable business, see page 28.

The Board’s report on Internal control for financial reporting

The Board has the ultimate responsibility of the internal control for the financial reporting.

Investor’s system of internal control and risk management, with regard to financial reporting, is designed to manage risks involved in the processes related to financial reporting and ensure a high level of reliability in the financial reporting. It is also designed to ensure compliance with the applicable accounting requirements and other requirements that Investor must meet as a listed company. Investor’s main business is the management of financial transactions and the company’s internal control over financial reporting is focused primarily on ensuring efficient and reliable management of, and accounting for, purchases, sales and accurate evaluation of securities. Correct consolidation of the operating subsidiaries is also a priority.

Investor’s wholly-owned operating subsidiaries have separate internal control systems in place for their operational activities. The Board of each of these companies is responsible for ensuring the efficiency of the operating subsidiary’s internal regulations, internal controls, risk management and financial reporting, as well as reporting on these items to respective company’s Board of Directors. Investor’s Board representatives provide this information to Investor’s investment organization, where analysis and follow-up take place.

Control environment

The control environment is built around an organization with clear decision-making channels, powers and responsibilities that are defined by explicit instructions and a corporate culture based on shared values. It also requires each individual’s awareness of his/her role in maintaining effective internal control. The corporate culture at Investor is based on four core values: Create value, Continuous improvement, Contribute your view and Care for people.

All of Investor’s business areas have policies, instructions and detailed process descriptions for the various phases of each business flow. These documents establish rules on responsibilities for specific tasks, mandates and powers and how validation is to be carried out. The governing documents are presented on the intra-net for all employees. The documents are updated yearly or when needed to ensure that they always reflect current legislation, regulations and changes in processes. The Compliance function educates and informs the organization continuously about internal policies and instructions. During 2013 the education has focused on Investor’s ethical guidelines and Investor’s instruction for gifts and benefits.

Risk assessment

Risk assessment, i.e. identifying and evaluating risks that could prevent the company from achieving its business goals and having reliable financial reporting, is conducted continuously at Investor. The Board, via the Finance and Risk Committee and the Audit Committee, is responsible for identifying and managing significant financial risks and any risks of material weaknesses in financial reporting. The Board follows up frequently on limits and risk exposure to ensure the ability to reach business strategies and goals.

The CEO is responsible for ensuring that the organization complies with the Risk policy and for the continuous management of all risks within the business. The Board’s and the Management’s support function for managing and identifying risks and activities required, is the Risk Control Function.

Investor’s Board representative in the subsidiaries ensures that Investor’s Board and Management is informed about any issue in the financial reporting, that could affect Investor’s business or financial reporting.

Risk measurement is performed daily regarding the Treasury and Trading businesses and provided to the Management Group. The financial reports are compiled monthly and provided to the Management Group.

</tbody>
</table>
Risk assessment is carried out yearly in the form of a self-evaluation and includes the establishment of action plans to mitigate identified risks. Risk assessment encompasses the entire organization and all of its processes. It takes into consideration such things as systems, control activities and key individuals. Special focus during 2013 has been on process enhancement and information security. When needed, action plans were implemented to minimize the probability and impact of identified risks. The identified risks are compiled in a company-wide risk map. Conclusions drawn from the risk assessments are then reported to the Management Group and the Board. The CEO and Management Group follow up on the implementation of action plans.

Using each business area’s risk assessment as a starting point, the Audit Committee determines which of the identified risks for the financial reporting should be prioritized by the Internal Control function. Focus is placed on risks of material weaknesses in the financial reporting for significant Income Statement and Balance Sheet items, which have a higher risk because of the complexity of the process, or where there is a risk that the effects of potential weaknesses may become significant because of the high transaction values involved. Actions such as improved control routines are when needed, taken in order to further ensure accurate financial reporting. The Finance and Risk Committee follows up on the measures in place for dealing with other risks.

For a more detailed description of Investor’s risks, see note 3, Risks.

Control activities
To ensure that business is conducted efficiently and that financial reporting gives a true and fair picture on each reporting date, every process incorporates a number of control activities. These involve all levels of the organization, from the Board and company Management to other employees.

At Investor, control activities include approval of business transactions, reconciliation with external counterparties, daily monitoring of risk exposure, daily account reconciliation, monthly custody reconciliation, performance monitoring and analytical monitoring of decisions. During 2013 the controls in the consolidation process have been confirmed. In addition new controls in Investor Growth Capital’s process for financial reporting have been implemented.

Investor’s financial reports are analyzed and validated by the company’s control function within Finance. The validation process consists of both automatic checks, including deviation reporting, and manual checks such as reasonability assessment of the values found. The effectiveness of the automatic checks in the IT systems is monitored regularly on the basis of information received from system administrators in the business process. Suggestions for improvements are identified and implemented on an ongoing basis.

Information and communication
Investor’s Board has adopted a communication policy for the purpose of ensuring that the external information is correct and complete. Within the company, there are also instructions regarding information security and how to communicate financial information between Management and other employees. The instruction for information security has been updated during the year and education has been held with the employees. During 2013 there has been a specific focus on implementing efficient processes for reporting of the financial information from the new subsidiary Permobil.

Monitoring
Both the Board and the Management Group regularly follow up on the compliance and effectiveness of the company’s internal controls to ensure the quality of internal processes. Investor’s financial situation and strategy regarding the company’s financial position are discussed at every Board meeting and the Board is furnished with detailed monthly reports on the financial situation and development of the business to this end. The Audit Committee plays an important role in ensuring and monitoring that control activities are in place for important areas of risk inherent in the processes for financial reporting. The Audit Committee, Management Group and Internal Control function regularly follow up reported deviations.
Board of Directors

**Jacob Wallenberg**
Born 1956
Chairman since 2005
Vice Chairman 1999-2005
Director since 1998

Auditor’s Report

To the annual meeting of the shareholders of Investor AB (publ.)
CORP ID 556013-8298

Report on the annual accounts and consolidated accounts
We have audited the annual accounts and consolidated accounts of Investor AB (publ) for the financial year ended December 31, 2013. The annual accounts and consolidated accounts of the company are included in the printed version of this document on pages 4-5, 13-14 and 25-98.

Responsibilities of the Board of Directors and the President for the annual accounts and consolidated accounts
The Board of Directors and the President are responsible for the preparation and fair presentation of these annual accounts in accordance with the Annual Accounts Act and of the consolidated accounts in accordance with International Financial Reporting Standards, as adopted by the EU, and the Annual Accounts Act, and for such internal control as the Board of Directors and the President determine is necessary to enable the preparation of annual accounts and consolidated accounts that are free from material misstatement, whether due to fraud or error.

Auditor’s responsibility
Our responsibility is to express an opinion on these annual accounts and consolidated accounts based on our audit. We conducted our audit in accordance with International Standards on Auditing and generally accepted auditing standards in Sweden. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the annual accounts and consolidated accounts are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the annual accounts and consolidated accounts. The procedures selected depend on the auditor’s judgement, including the assessment of the risks of material misstatement of the annual accounts and consolidated accounts, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the company’s preparation and fair presentation of the annual accounts and consolidated accounts in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company’s internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the Board of Directors and the President, as well as evaluating the overall presentation of the annual accounts and consolidated accounts.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions
In our opinion, the annual accounts have been prepared in accordance with the Annual Accounts Act and present fairly, in all material respects, the financial position of the parent company as of 31 December 2013 and of its financial performance and its cash flows for the year then ended in accordance with the Annual Accounts Act. The consolidated accounts have been prepared in accordance with the Annual Accounts Act and present fairly, in all material respects, the financial position of the group as of 31 December 2013 and of their financial performance and cash flows for the year then ended in accordance with International Financial Reporting Standards, as adopted by the EU, and the Annual Accounts Act. A Corporate Governance report has been prepared. The statutory administration report and the Corporate Governance report are consistent with the other parts of the annual accounts and consolidated accounts.

We therefore recommend that the annual meeting of shareholders adopt the income statement and balance sheet for the parent company and the group.

Other matters
The audit of the annual accounts for the financial year 2012 were performed by another auditor who submitted an auditor’s report dated March 13, 2013, with unmodified opinions in the Report on the annual accounts and consolidated accounts.

Report on other legal and regulatory requirements
In addition to our audit of the annual accounts and consolidated accounts, we have also examined the proposed appropriations of the company’s profit or loss and the administration of the Board of Directors and the President of Investor AB (publ.) for the financial year ended December 31, 2013.

Responsibilities of the Board of Directors and the President
The Board of Directors is responsible for the proposal for appropriations of the company’s profit or loss, and the Board of Directors and the President are responsible for administration under the Companies Act.

Auditor’s responsibility
Our responsibility is to express an opinion with reasonable assurance on the proposed appropriations of the company’s profit or loss and on the administration based on our audit. We conducted the audit in accordance with generally accepted auditing standards in Sweden.

As a basis for our opinion on the Board of Directors’ proposed appropriations of the company’s profit or loss, we examined the Board of Directors’ reasoned statement and a selection of supporting evidence in order to be able to assess whether the proposal is in accordance with the Companies Act.

As a basis for our opinion concerning discharge from liability, in addition to our audit of the annual accounts and consolidated accounts, we examined significant decisions, actions taken and circumstances of the company in order to determine whether any member of the Board of Directors or the President is liable to the company. We also examined whether any member of the Board of Directors or the President has, in any other way, acted in contravention of the Companies Act, the Annual Accounts Act or the Articles of Association.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinions.

Opinions
We recommend to the annual meeting of shareholders that the profit be appropriated in accordance with the proposal in the statutory administration report and that the members of the Board of Directors and the President be discharged from liability for the financial year.

Stockholm, 25 March, 2014
